

**Item:**

**gb #7-124**

BioBuilder was a spring after school Biotech program eligible to North, Doherty and WTHS students. MA Life Science Center gave BioBuilder money to support a Worcester and a Cambridge program.

MA Life Science separately has a paid biotech summer internship program which all students in MA are eligible for. This is called the MA Apprenticeship Challenge.

Preference is given to students that completed the BioBuilder program and secondarily to students in a technical program for Biotechnology.
