

## My Discovery Education

**Presenter:** [Discovery Education](#)

**PDPs:** 1

**Location:** Online

**Dates:** Complete the course work anytime between 4/03/17 & 4/28/17

**Audience:** All Educators

Whether you are brand new to Discovery Education or looking for new ways to maximize your experience, this interactive and **self-paced** learning module guides you through new and dynamic features. There are three sessions for this online PD course: Search for Resources, Bookmark with Quick List and Builder Tools. Upon completion, you can take a quiz to receive a certificate for an hour of professional development credit.

- **Search for Resources:** In this session, you'll learn how to perform a keyword search, search for resources aligned to particular standards, use Advanced Search to isolate for specific parameters, take advantage of our original content collections, and narrow results using a variety of filters.
- **Bookmark with Quick List:** In this session, you'll learn how to manage your QuickList: add resources, access your list, launch resources, and delete resources; and manage your My Content resources: add resources, access your folders, and use the structure to organize, share, and assign selected resources.
- **Builder Tools:** In this session, you'll learn how to create assignments, prompts, and quizzes, using items provided by Discovery Education, items you create, or some combination. You'll also learn how to access Discovery Education Board Builder.
