

FRENCH RIVER EDUCATION CENTER

NEW for Summer 2017

"FULL S.T.E.A.M. AHEAD IN THE ELEMENTARY CLASSROOM"

Instructor: Janice Berthiaume, MEd

June 26 – 30, 8:30 – 3:00

Oxford High School, Oxford MA

As technology in our world continues to advance at a rapid speed, the need for emphasis on **Science, Math, and Technology** in education becomes even more essential. The STEM movement, which began around 2006, was an attempt to elevate these three subjects to the top educational priority in our schools. Soon after, a push to *add the Arts to the STEM priority resulted in transforming 'STEM' to S.T.E.A.M.*

The objective of this course is to demonstrate how STEAM can, and should, become an essential part of every elementary classroom. Through the use of multi-media, hands-on activities and projects, exploration of available resources, and examination of the STEAM movement, participants will gain an understanding of, appreciation for, and ability to easily implement **STEAM** into their own classrooms. ***We are accepting registrations now.***

Complete this form and **fax (508-987-1396)**; **email (mfields@frec.org)** or **mail** with check to: **French River Education Center, PO Box 476, North Oxford, MA 01537.**

Tuition: \$695 Member Districts; \$795 Non-Member Districts
