Check our website for full schedule of Jeanine Fitzgerald workshops

<http://worcesterschools.org/worcester-family-partnership>

Come listen to behaviorist Jeanine Fitzgerald

ORCHESTRATING ATTENTION

Attention can be thought of as a system of brain controls and are essential for learning, behaving and relating well to others. It should not be surprising, therefore, that children who have weaknesses in the attention system may possess strong abilities that they are unable to use effectively. Their inability to direct these functions may lead to problems in developing skills, adjusting behavior, and succeeding socially. This session looks at the attention control systems and proven ways to strengthen them.
