

The Worcester Public Schools' Technology Student Information System subcommittee is comprised of 15 staff from across the district. This committee met during the 2017-18 school year and agreed upon recommending a modern student information system that includes an integrated gradebook. This was also a recommendation of the Strategic Plan and is included in the technology plan that will be presented to School Committee. Three vendors came to speak with the committee and gave demos, but no formal bid process has happened due to lack of funds. It is anticipated that a student information system with a gradebook would have an annual cost of approximately \$185,000 with a onetime implementation cost of \$125,000.
