Pre-College Programs

Women's Research And Mentorship Program (WRAMP)

The WPI Women's Research And Mentorship Program is for young women who are interested in learning about STEM research alongside.

This program exposes young women to positive female role models with a STEM background who are pursuing an undergraduate, masters, doctorate, or post-doctoral degree. Each student will be matched with an undergraduate and graduate student to work on a research project in a mentoring setting.

High school women will work weekly on their research project 2-4 hours per week and will also attend **two mandatory Saturday Workshops** with their cohort.

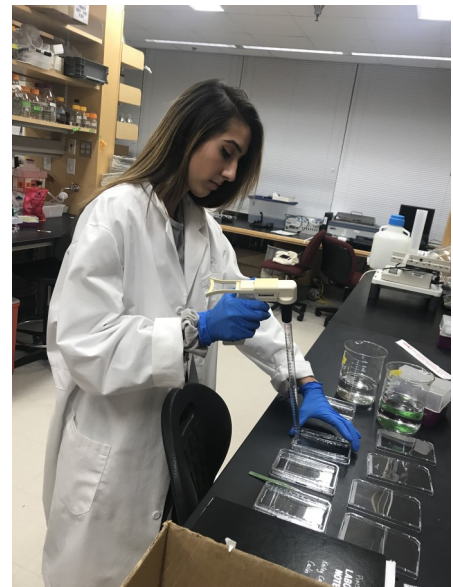

APPLY HERE!

Grades: Girls in Grades 10 & 11

Program Dates: September—December 2019

Saturday Workshops (from 9am - 12pm):

- ◆ September 21, 2019
- ◆ December 7, 2019

*This program is funded through a Women's Impact Network grant. Preference is given to young women in Worcester Public Schools who identify as women of color. **High school participants will receive a \$250 participation stipend upon completion of the program and \$500 towards an STEM summer program at WPI in 2020. (Students must complete all of the program meetings to be eligible for the stipend).***
