

The Administration was requested to explore the feasibility of constructing a pathway from St. Paul Drive to Flagg Street School. The Administration contracted a civil engineer to design and estimate the cost of the path.

As shown in the attached schematic design, the asphalt paved path would be created from the rear entrance of the school on St. Paul Drive and connect to existing pathways connecting to the school entrance and basketball court. The path will be 300 feet long and 5 feet wide.

It is estimated that this pathway will cost \$25,000 to \$30,000 to install. The Administration recommends using existing building renovation funds to complete this work. Due to adjacent waterways, this project will require additional regulatory review and approvals. Upon all timely approvals, the work would be scheduled to be bid and completed during summer 2020.
