

# May's News

Grade 6 Ms. Carroll & Mrs. Faiola

**Math:** Students are learning how to find the surface area of solid figures; prisms and pyramids. They will then move on to finding the volume of these figures. Our final unit of study will be on Statistics and Probability which will begin later this month.

**Science:** Students are currently learning about properties of matter. Then, they will begin a unit on Engineering and Design.

**ELA:** Students are currently reading *A Long Walk to Water* by Linda Sue Park. After finishing up this terrific fictional dual autobiography which is based on real life stories and teaches about many themes including survival, family and community, perseverance, and war and society students will begin book clubs. Students will continue to collect, interpret, and apply information through reading, discussion, and writing as a group.

**History & Social Science:** Students have been learning about the history, politics, geography, culture, economics, and social structures in Western Europe. Their final project will be a Google Slides presentation.
